An infographic presenting the contractual relationships which may exist in an AI as a Service (AlaaS) model, the various rights holders involved and the legal issues to be considered.

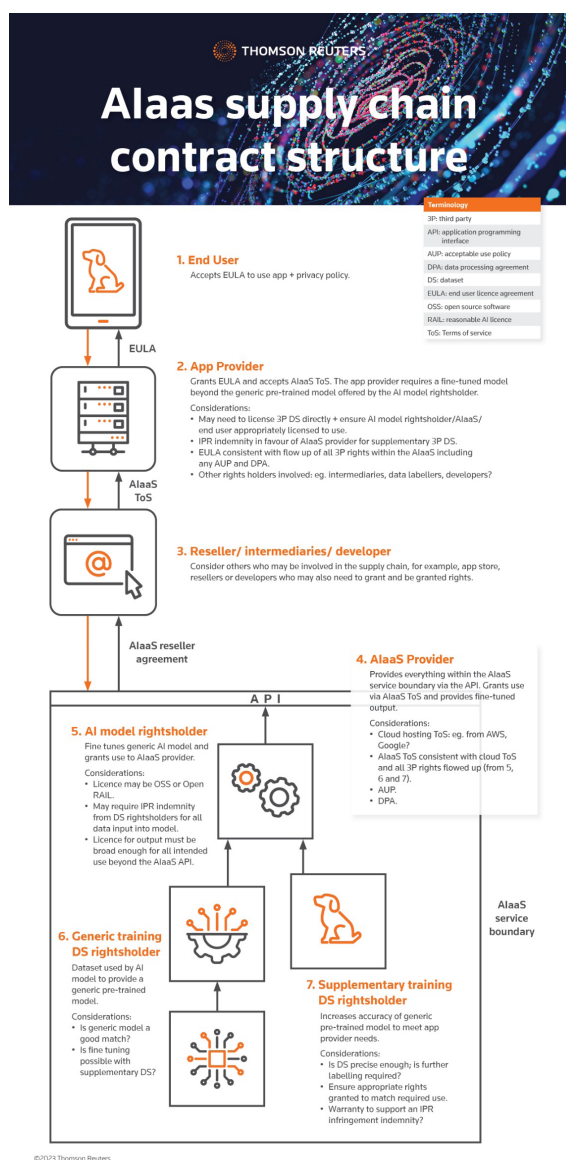

This infographic presents the contractual relationships which may exist in an AI as a Service (AlaaS) model, the various rights holders involved and the legal issues to be considered. It uses the example of a dog identification app running on a mobile phone and the technology stack sitting behind this.

For an example of AlaaS terms of service (ToS), see [Standard documents, Software as a service \(SaaS\) subscription agreement \(pro-supplier\)](#) or [Software as a service \(SaaS\) subscription agreement \(pro-customer\)](#).

For other agreements that may be useful, see [Standard documents:](#)

- [Software as a Service \(SaaS\) reseller agreement.](#)
- [Data licence agreement \(general\).](#)
- [Click-wrap SaaS EULA \(for business end users\).](#)

For an introduction to AlaaS, see [Practice note, Demystifying artificial intelligence \(AI\): AI as a Service \(AlaaS\).](#)
